Sikhs in Clinical Research (SICR)

Understanding Cultures,
Empowering Care

About SICR

Sikhs in Clinical Research (SICR) is a US-based organization dedicated to promoting diversity, representation, and cultural understanding in clinical research.

Our Goal:

- Raise clinical research awareness as a career and treatment option in Sikh community
- Support healthcare providers with Sikh-focused education and training
- Bridge cultural and language gaps in healthcare

What We Do:

- Empower community to explore clinical research as a career option
- Help patients find clinical trials in their area
- Provide basic information about clinical trial process
- Reduce health disparities by promoting health screenings
- Promote health and research literacy
- Offer Punjabi translation services and cultural training to healthcare professionals

We work where science, culture, and care come together.

Cultural Competency Training Curriculum

- Sikh Articles of Faith
- Language Access
- Medicinal Guidelines
- Cultural Sensitivities
- Dietary Considerations
- Emotional and Spiritual Support

Formats Available:

- Live/virtual presentations
- Self-paced video modules
- Patient care guides
- Case studies
- Pre- and post-surveys to measure impact/success
- Printable reference materials for long-term sustainability

Why Cultural Competence Matters in Healthcare

- Enhances patient-provider communication
- Fosters trust and satisfaction
- Encourages care-seeking and treatment adherence
- Leads to better overall health outcomes

Culturally competent training helps healthcare providers deliver more effective, respectful, and personalized care to diverse populations. It enhances provider confidence and improves patient satisfaction.
